<body>
  <div class="page-header">
    <h1>Introduction to Bootstrap</h1>
    
  </div>
  <div class="container-fluid">
    <p>Get started with <mark>Bootstrap</mark>, the world's most popular
framework for building responsive, mobile-first sites, with Bootstrap <abbr
title="Content Delivery Network">CDN</abbr> and a template starter
page.</p>

    <p>According to the official website, Bootstrap is the most popular
HTML, CSS, and JS framework for developing responsive, mobile-first
projects on the web. Sounds great! Now how do I use it? It would be easy to
send you over to their Getting Started page and call it a day. Their setup
guide is indeed a host of useful information – links to CDNs, explanations
on how to install with Bower, npm, and Composer, information on integration
with Autoprefixer and LESS, a bunch of templates, licenses, and
translations – but you could read this blog here instead for a better and
easier understanding.</p>
    <span class="glyphicon glyphicon-pencil"></span>

    <p class="text-center">The list below shows the different versions of
Bootstrap so far. <span class="glyphicon glyphicon-list-alt"></span></p>

    <ul class="list-group">
      <li class="list-group-item">v1.x</li>
      <li class="list-group-item">v2.x</li>
      <li class="list-group-item">v3.x</li>
      <li class="list-group-item">v4.x</li>
    </ul>

    <p class="text-center bg-info"> The main features of Bootstrap are that
it is very simple and easy to use, huge JavaScript plugins are available,
and it easily designs mobile-friendly websites.</p>

  </div>

  <div class="container-fluid">
    <h2>Features of Bootstrap</h2>
    <table class="table table-bordered table-striped">
      <thead>
        <tr>
          <th>Features of Bootstrap</th>
        </tr>
      </thead>
    </table>
  </div>

  <p class="text-left">Let's take a look at the components of
Bootstrap:</p>
  <h1>CSS<span class="badge badge-secondary">Quoted</span></h1>
  <p class="text-justify">Copy-paste the stylesheet link into your head
before all other stylesheets to load our CSS.</p>
  <h2>JS <span class="badge badge-secondary">Quoted</span></h2>
  <p class="text-justify">Many of our components require the use of
JavaScript to function. Specifically, they require jQuery, Popper.js, and
our own JavaScript plugins. Place the following scripts near the end of
your pages, right before the closing body tag, to enable them. jQuery must
come first, then Popper.js, and then our JavaScript plugins. We use
jQuery's slim build, but the full version is also supported.</p>
